👤 PROFILE

Software Engineer with 3+ years of experience building scalable backend systems, microservices, and multi-tenant SaaS platforms. Skilled in **Python, Django, FastAPI, PostgreSQL, Redis, and Docker**, with hands-on experience in **LLM integration** and workflow automation. Proven track record of scaling systems for **10,000+ concurrent users** and modernizing legacy platforms.

📁 PROFESSIONAL EXPERIENCE

Lead Software Engineer-II

10/2025 – Present | Pune, India

Schiender Electric

- Contributing to modernization of **enterprise billing platforms** supporting large-scale **utility customer operations** and **multi-tenant systems**.
- Worked on migration of legacy billing services from **Java / Scala** components to **FastAPI (Python) microservices**, improving maintainability, scalability, and development speed.
- Enhanced **billing ingestion pipelines**, validation workflows, and downstream processing reliability for high-volume bill operations.
- Supported intelligent bill routing/classification workflows to identify correct **tenant/account context** for incoming billing data and automate processing.
- Built and supported asynchronous **event-driven workflows** using **Google Pub/Sub, AWS SQS**, and internal messaging systems.
- Improved system resilience through **queue-based processing**, retries, decoupled services, and scalable background job execution.
- Worked within **AWS cloud environments** handling **IAM roles**, permissions, service access, and production infrastructure changes.
- Participated in **decommissioning legacy services/resources** to reduce technical debt and improve platform efficiency.
- Worked on analytics and reporting solutions using **Databricks, SQL pipelines**, and dashboarding tools for business visibility.
- Built and enhanced dashboards for **operational KPIs, funnel metrics**, customer reporting, and internal decision-making.
- Investigated and resolved data inconsistencies across reports, dashboards, and source systems using **advanced SQL analysis**.
- Implemented configurable **tenant-level business rules**, workflow logic, and compliance-oriented controls across platforms.
- Collaborated with **product managers, analysts, and engineering teams** to deliver production-grade features and enhancements.

Software Engineer

03/2023 – 09/2025 | Pune, India

Lead Software Engineer - I

Techademy Campus LMS Platform

- Developed **ERP modules** for order placement, procurement, and inventory management, improving institutional workflows using **Django, PostgreSQL, Redis**.
- Designed and deployed **blockchain-based certificate issuance system** for tamper-proof digital credentials.
- Integrated **LLM APIs** to automate certificate verification, metadata validation, and formatting checks.

Techademy One – Microservices Platform

- Built **microservices** for user management, billing, licensing, tenant customization, and notifications with **Celery + WebSockets** for real-time alerts and schedule updates.
- Engineered **usage-based billing engine** and analytics dashboards for product usage tracking.
- Leveraged **OpenAI API + LangChain** to build automated FAQ and support assistant workflows.

Yaksha – AI-Powered Assessment Platform

- Designed **multi-tenant assessment platform** integrated with enterprise systems.
- Built **LLM-driven subjective answer evaluation** using prompt templates and scoring rubrics.
- Developed **RAG reviewer assistant** using **LangChain + pgvector** for contextual evaluation support.

- Scaled platform to **10,000+ concurrent users** using async workers, optimized SQL, Redis caching, and automated scheduling workflows.

Java Development Intern

08/2021 – 09/2021 | Pune, India

Suven Consultants and Technology Pvt. Ltd.

Built Java-based components focused on object-oriented principles and clean backend logic.

 SKILLS

Programming Languages:

Python (Advanced), Java, C++, SQL

Web & Backend Development:

Django, FastAPI, Spring Boot, REST APIs, WebSockets, SQLAlchemy

AI & LLMs:

Prompt Engineering, OpenAI APIs, Retrieval-Augmented Generation (RAG), LangChain, LLM Integrations

Databases:

PostgreSQL, MySQL, MongoDB, Redis

DevOps & Tools:

Docker, Kubernetes (Basics), CI/CD, Git, AWS, IAM

Authentication & Security

Keycloak, Azure AD, JWT, RBAC, Multi-Tenant Isolation

Agile & Project Management:

JIRA, Scrum, Agile Development

Architecture & Patterns

Microservices, Multi-Tenant SaaS, Asynchronous Processing, Event-Driven Architecture, Caching

 PROJECTS

Osteoarthritis Grade Prediction System

10/2021 – 07/2022

- Built a web-based diagnostic tool using Python and Flask to analyze X-ray images for osteoarthritis detection. Trained ML models with scikit-learn and added visual grading reports to support clinical use.

Attendance Management App

05/2021 – 07/2021

- Built a web-based diagnostic tool using Python and Flask to analyze X-ray images for osteoarthritis detection. Trained ML models with scikit-learn and added visual grading reports to support clinical use.

College Management System

07/2020 – 12/2020

- The College Management System project has been condensed and aligned with the format of the other academic projects. Let me know if you'd like to reorder them, add GitHub links, or finalize this section for export.

 CERTIFICATES

- Oracle Infrastructure AI Foundations Associate(Sept'25-Oct '25)
 - AI for Everyone – Andrew Ng (Coursera) – 2022
- Machine Learning (Stanford, Coursera) (April 2021 – July 2021)
 - Python Programming Certification
- Backend System Design Workshop – Techademy Internal, 2023

 EDUCATION

Bachelor of Engineering (B.E.)

08/2018 – 08/2022 | Bangalore, India

Jain College of Engineering and Research

Pre-University Education

06/2016 – 06/2018 | Belagavi, India

Jain University
