PROFESSIONAL SUMMARY

Java Developer (**Immediate Joiner**) with 3.1 years of experience in **Java**, **Spring boot**, Experienced in all phases of the software development lifecycle, including analysis, design, development, and unit testing within an agile environment. Seeking an immediate opportunity.

TECHNICAL SKILLS

- **Languages:** Core Java, Spring, **Spring Boot**, relational databases, **MySQL**, PostgreSQL, Junit, Spring Boot (Spring Core, Spring MVC, Spring AOP, Spring Data JPA, Rest API's, Spring Security)
- **Core Technical Competencies:** OOPS, RESTful Web services, Spring Data, **SOLID** design patterns, microservices, data structures, algorithms, OAuth, Kafka, Maven, Redis, Debugging skills
- **Developer Tools:** Git, GitHub, Docker, IntelliJ, Eclipse, Postman, Jira
- **Soft Skills:** Team player, independent worker, **problem-solving**, analytical, communication, attention to detail

EXPERIENCE

Software Engineer — Wipro Technologies

(Hyderabad, Feb 2022 – Apr 2025)

Project: Insurance Claims Processing System

Dec 2022 – Apr 2025

Description

- A centralized platform designed to efficiently manage and process insurance claims, incorporating real-time updates and automation to streamline the claims handling process.

Responsibilities

- Worked as a backend developer using Spring Boot and Java as core technologies.
- Developed real-time claim status updates to enhance transparency and client satisfaction.
- Developed **REST APIs** and business features with transaction management.
- Integrated **Redis cache** for efficient data caching, significantly boosting application performance and reducing database load.
- Contributed to the development, deployment, and maintenance of a monolithic architecture.
- Implemented **OAuth** for secure user authentication, improving system security.
- Experienced in design patterns and implementing CI/CD pipelines.
- Experienced in designing and implementing highly scalable applications and collaborating with cross-functional teams and Translating business requirements into technical solutions..

Tech Stack

- Java, Spring Boot, REST APIs, Git, MySQL, Redis, Kafka

Project: FedEx Dispatch Management System

Feb 2022 – Dec 2022

Responsibilities

- Implemented code using SOLID design principles.
- Worked in Agile/Scrum processes with full software development life cycle, including coding standards and code reviews.
- Implemented test driven development with JUnit for writing unit test cases.
- Translated requirements into technical design specifications and documentation, and executed development projects from conception to delivery.
- Performed analysis, design, coding, and testing of multiple components of application code across one or more clients.
- Developed Java Enterprise Edition applications and deployed using Jenkins.
- Troubleshoot and debugged application issues to ensure optimal performance.
- Resolved many production Defects(bugs) by troubleshooting, researching, debugging the codebase
- Learnt hands on Java 8: Multi-threading, Concurrency, Exception Handling, Collections, File IO, Serialization, Memory Management, Garbage Collection, Multithreading, Synchronization, asynchronous programming

EDUCATION

Lovely Professional University

Bachelor of Technology in Computer Science

Punjab, India

Aug. 2017 – July 2021
